<b>MARCH</b> Sprinklers off	<b>APRIL</b> Water 1 day a week	<b>MAY</b> Water 2-3 days a week	<b>JUNE</b> Water 3 days a week
<b>JULY</b> Water 3 days a week	<b>AUG</b> Water 3 days a week	<b>SEPT</b> Water 2 days a week	<b>OCT</b> Water 1 day a week

### ADJUST DAYS, NOT MINUTES

Your watering minutes per zone should not change throughout the season. As the weather gets hotter or cooler you will only change the number of days you water per week. These are approximate watering times, you will need to make adjustments.

- **WATER 1, 2, or 3 DAYS A WEEK DEPENDING ON THE MONTH**
- **WATER START TIME: 11:30 AM**

*If water runoff is a problem, cut your watering time in half and water twice in the same day. Allow an hour between water cycles so the water has time to soak in.*

**A smart sprinkler timer with a phone app will make programing your water schedule much easier. We recommend getting one installed.**
